PROFESSIONAL SUMMARY

Third-year B.Tech Computer Engineering student targeting Software Development Intern roles. Built a working CivicFix prototype using AI-assisted development with Antigravity, bringing together civic complaint submission, ML-assisted categorization, priority scoring, duplicate detection, and location-based workflows. Familiar with C++, HTML, CSS, Git/GitHub, and AWS, with ongoing practice in problem-solving.

EDUCATION

B.Tech, Computer Engineering | MIT Academy of Engineering (MITAOE), Alandi | Expected 2028 | CGPA: 8.06/10
Class XII | 77.5%
Class X | 95.6%

TECHNICAL SKILLS

Programming: C++
Web: HTML, CSS
Tools: Git, GitHub, Antigravity (AI-assisted development)
Cloud / Other: AWS fundamentals; exposure through a Solutions Architecture job simulation
Problem Solving: LeetCode: 12 problems solved; currently building consistency with array-focused practice

PROJECTS

CivicFix | AI-Assisted Civic Complaint Management Prototype

- Built a working prototype for civic issue reporting, allowing citizens to submit complaints for review and department routing.
- Integrated AI/ML-assisted complaint categorization and a formula/ML-based priority and SLA scoring workflow.
- Implemented semantic duplicate-complaint detection with a 100-metre proximity requirement, alongside human-review handling.
- Worked on map-based location selection and complaint assignment; location handling remains an area for improvement.
- Used Antigravity as an AI-assisted development tool to build and iterate on the project end to end.

CERTIFICATIONS & TRAINING

AI/ML Virtual Internship | Google Developers | June–August 2026
Solutions Architecture Job Simulation | AWS | June 24, 2025
Prompt Engineering for Everyone (AI0117EN) | IBM Skills Network | June 24, 2025

LEADERSHIP & ACTIVITIES

- Global SDG + AI Hackathon 2026: Team leader for CivicFix; selected among 20 teams from 132 for the offline round.
- Smart India Hackathon (SIH): Participated.
- Placement Cell Volunteer: Supports event coordination.
